

Ellis Pinaman

Platform Engineer | Cloud & DevOps Automation | AWS · Terraform · Python
epinaman@yahoo.com | 614-695-8215 | Columbus, Ohio | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Platform Engineer with 4+ years of experience building cloud automation, developer tooling, backend services, and secure hybrid infrastructure in regulated enterprise environments. Hands-on across AWS, Python, Terraform, Docker, CI/CD, and observability/telemetry, with measurable outcomes including automation supporting a 900+ repository migration and approximately \$126K in annual cloud-overhead reduction.

TECHNICAL SKILLS

Cloud & Platform: AWS · GCP · Azure · Terraform · Pulumi · AWS CDK · Docker · GitHub Actions · CI/CD · Linux · FinOps
Software & Data: Python · FastAPI · SQLAlchemy · PostgreSQL · pgvector · SQL · Bash · PowerShell · REST APIs · NLP
Observability & Security: Grafana · Telemetry · Infrastructure Hardening · IAM · Zero Trust · Security Automation · HIPAA · SOC 2 · PCI DSS · CCPA

PROFESSIONAL EXPERIENCE

Agility Partners

Dublin, OH · Hybrid

Platform & Backend Engineer — Contract

June 2026 Contract

- Audited and unblocked critical architectural constraints for a high-priority greenfield application, improving platform readiness before production release.
- Consolidated 20+ code-quality and security validation workflows into reusable pull-request runners, improving CI consistency and reducing backend operational overhead.
- Designed reproducible AWS CloudFront infrastructure using custom CDK constructs, establishing standardized infrastructure-as-code scaffolding across environments.
- Hardened containerized environments by identifying and remediating high-severity infrastructure and configuration vulnerabilities.

Quantum Health

Dublin, OH · Hybrid

IT Operations Analyst II — Platform Engineering & Cloud Automation

Nov 2024 — Jun 2026

- Terraform Cloud → S3 Migration:** Eliminated approximately \$126K in annual cloud overhead through a 12-step automated migration across 900+ repositories using Python/Boto3 and Terraform.
- Security Data Fabric:** Architected a Bronze/Silver/Gold security data platform for the Director of InfoSec using FastAPI, SQLAlchemy, PostgreSQL/pgvector, and telemetry from 10+ enterprise sources.
- POPSMirror Hackathon:** Built a one-day honorable-mention prototype to modernize the development team's testing environment with Playwright, pytest, and Locust, simulating application behavior and load during production-style deployments.
- Collaborated across InfoSec, DevOps, Endpoint Systems, and engineering teams to improve platform reliability, automation maturity, and security posture.

OhioHealth (via TEKsystems)

Columbus, OH · On-Site

Field Systems Administrator II — Contract

Apr 2023 — Nov 2024

- Supported infrastructure operations and endpoint security across 12 hospital facilities in a HIPAA-regulated healthcare environment.
- Provisioned and deployed 1,000+ secure endpoints while supporting infrastructure serving 5,000+ clinical staff and 99.8% uptime.
- Built SCCM automation workflows that cut endpoint provisioning time 55% (90 minutes to 40 minutes).
- Managed PXE imaging, GPO configuration, application packaging, NAC compliance, IoT troubleshooting, vendor coordination, and security hardening.

SHOWCASE PROJECTS

NullPointVector — AI Threat Detection Platform | [Live Demo](#) | [GitHub](#)

- Built an end-to-end Python threat-detection platform across email, SMS, and voice channels with FastAPI, PostgreSQL/pgvector, NLP, Docker, and hardened CI/CD.
- Achieved 94% detection accuracy and 80% false-positive reduction; engineered services designed for 1M+ daily evaluations at sub-200ms latency.

FinOps Cost-Control-as-Code | [GitHub](#)

- Built an event-driven AWS cost-control platform with Pulumi, Lambda, EventBridge, SNS, CloudWatch, Cost Anomaly Detection, and reusable security patterns.

HA-BLE-MQTT Bridge | [Project](#) | [GitHub](#)

- Reverse-engineered proprietary BLE smart-lighting protocols and built asynchronous Python/MQTT middleware for local Home Assistant orchestration with resilient remote connectivity.

EDUCATION & CERTIFICATIONS

Western Governors University — B.S. Computer Science | ~50% complete | Expected 2027

[Google Cloud Associate Cloud Engineer \(GCP-ACE\)](#) • AWS Certified DevOps Engineer — Professional (DOP-C02) • AWS Certified Security — Specialty (SCS-C03) • [CompTIA Security+](#) • [CompTIA Network+](#) • [CompTIA A+](#)
